## Health Sciences

## Math and Science (ASMSAS)

Associate in Science Degree
Program Effective Term: Fall 2021

## High Demand Occupation High Skill Occupation High Wage Occupation

This program prepares students to transfer to a four-year college or university to complete a bachelor's degree in actuarial science, biology, chemistry, math, or pharmacy. The program will give students a solid foundation in math and science. Students should obtain program requirements and transfer equivalencies from the college to which they are transferring.

Complete the requirements for one of the following concentrations. These concentrations may also list courses used to meet General Education requirements.

Biology/Pre-Medicine (BMED)
CEM 111 General Chemistry I
CEM 122 General Chemistry II
CEM 211 Organic Chemistry I
CEM 222 Organic Chemistry II
Elective: BIO 111, BIO 208, BIO 215, BIO 227 or BIO 237
Chemistry/Pre-Medicine (CMED)
CEM 111 General Chemistry I
CEM 122 General Chemistry II
CEM 211 Organic Chemistry I
CEM 222 Organic Chemistry II
MTH 197 Linear Algebra
Mathematics (MATH)
MTH 160 Basic Statistics
MTH 191 Calculus I
MTH 192 Calculus II
MTH 197 Linear Algebra
MTH 293 Calculus III
MTH 295 Differential Equations
Pre-Actuarial Science (PPAS)
ECO 211 Principles of Economics I
ECO 222 Principles of Economics II
MTH 191 Calculus I
MTH 192 Calculus II
MTH 197 Linear Algebra
MTH 293 Calculus III
Pre-Pharmacy (PPHA)
Two Restricted Electives in Biology (see below)
CEM 211 Organic Chemistry I
CEM 222 Organic Chemistry II
PHY 111 General Physics I
PHY 122 General Physics II
Biology Restricted Electives for Pre-Pharmacy (PPHA): BIO 111, BIO 161, BIO 162, BIO 208, BIO 237, BIO 215 or BIO 227
Optional Transfer Courses for Pre-Pharmacy (PPHA): MTH 160, MTH 192, along with other Biology restricted electives. See a
program advisor to select appropriate Biology courses.

## Articulation:

This program will fulfill the Michigan Transfer Agreement (MTA) requirements provided the student takes two science courses from two different disciplines. One course must have a lab component. Students must have MTA posted on their transcripts by the WCC Student Records Office.

## Program Admission Requirements:

- Students must have an Academic Math Level of 7 to begin the math sequence. Two years of high school algebra and one year of

## Program Information Report

high school pre-calculus are recommended to prepare for this program.

- The biology and chemistry concentrations require one year of high school chemistry or CEM 101 with a "C" or better to enroll in CEM 111.

## Minimum Concentration Credits Required for the Program: <br> Select a concentration for requirements and total credits required for program. <br> Math and Science Concentrations

## Notes:

*Students transferring to EMU as a biology major may substitute MTH 176 or any higher 4-credit hour math course for MTH 191.
**Students transferring to EMU as a biology major may substitute MTH 160 or higher for MTH 192.
***Students transferring to EMU as a biology major may consider completing BIO 208 at WCC prior to transfer.
+See the MTA list to make course selections from any discipline except ECO.
++ Transfer students should consider a course from the the EMU Diverse Word Requirements list.

## Notes:

*Students transferring to EMU as a biology major may substitute MTH 176 or any higher 4-credit hour math course for MTH 191.
**Students transferring to EMU as a biology major may substitute MTH 160 or higher for MTH 192.
***Students transferring to EMU as a biology major may consider completing BIO 208 at WCC prior to transfer.
+See the MTA list to make course selections from any discipline except ECO.
++ Transfer students should consider a course from the the EMU Diverse Word Requirements list.

## WCC General Education Requirements

Effective Fall 2018

Associate degree programs were updated to meet the revised WCC general education requirements below.

## Course Distribution Requirements

Associate degree students must complete courses from each of six General Education content areas. The requirements vary, depending on which degree is being earned. The number of general education credit hours required for each degree is as follows.
\(\left.$$
\begin{array}{llll}\hline & \text { AA } & \text { AS } & \text { AA } \\
\hline \text { Writing/Composition } & \begin{array}{l}3-4 \\
\text { credits }\end{array} & \begin{array}{l}3-4 \\

## Transfer and University Parallel Programs

If your goal is to continue your education toward a baccalaureate degree, then transfer and university parallel programs is the track for you. Complete the first two years of study in a supportive environment with small classes and personal attention.

Before beginning any transfer program, a student should consult with an academic advisor or counselor to obtain a program articulation agreement or a transfer guide. Early in the program, the student should contact an undergraduate advisor at the transfer college for specific admission and curriculum requirements and, if available, an unofficial transfer-credit evaluation.

Copies of articulation agreements and transfer guides are available in the Counseling Office on the second floor of the Student Center Building. Computers with access to the Internet Web sites of four-year colleges and universities are also available there.

## Math and Science

Learn more about math or science through this associate degree program.

## Math and Science (ASMSAS) <br> Associate in Science Degree <br> Program Effective Term: Fall 2018

High Demand Occupation High Skill Occupation High Wage Occupation

This program prepares students to transfer to a four-year college or university to complete a bachelor's degree in actuarial science, biology, chemistry, math, or pharmacy. The program will give students a solid foundation in math and science. Students should obtain program requirements and transfer equivalencies from the college to which they are transferring.

Complete the requirements for one of the following concentrations. These concentrations may also list courses used to meet General Education requirements.

Biology/Pre-Medicine (BMED)
CEM 111 General Chemistry I
CEM 122 General Chemistry II
CEM 211 Organic Chemistry I
CEM 222 Organic Chemistry II
Elective: BIO 111, BIO 208, BIO 215, BIO 227, BIO 228 or BIO 237
Chemistry/Pre-Medicine (CMED)
CEM 111 General Chemistry I
CEM 122 General Chemistry II
CEM 211 Organic Chemistry I
CEM 222 Organic Chemistry II
MTH 197 Linear Algebra
Mathematics (MATH)
MTH 160 Basic Statistics
MTH 191 Calculus I
MTH 192 Calculus II
MTH 197 Linear Algebra
MTH 293 Calculus III
MTH 295 Differential Equations
Pre-Actuarial Science (PPAS)
ECO 211 Principles of Economics I
ECO 222 Principles of Economics II
MTH 191 Calculus I
MTH 192 Calculus II
MTH 197 Linear Algebra
MTH 293 Calculus III
Pre-Pharmacy (PPHA)
Two Restricted Electives in Biology (see below)
CEM 211 Organic Chemistry I
CEM 222 Organic Chemistry II
PHY 111 General Physics I
PHY 122 General Physics II

Biology Restricted Electives for Pre-Pharmacy (PPHA): BIO 111, BIO 161, BIO 162, BIO 208, BIO 237, BIO 215, BIO 227 or BIO 228 Optional Transfer Courses for Pre-Pharmacy (PPHA): MTH 160, MTH 192, along with other Biology restricted electives. See a program advisor to select appropriate Biology courses.
Articulation:
This program will fulfill the Michigan Transfer Agreement (MTA) requirements provided the student takes two science courses from two different disciplines. One course must have a lab component. Students must have MTA posted on their transcripts by the WCC Student Records Office.

This program will fulfill MACRAO requirements if, in addition to the courses completed to meet General Education requirements, students complete one additional course in Social and Behavioral Science. Students must have MACRAO posted on their transcripts by the WCC Student Records Office.

## Program Admission Requirements:

- Students must have an Academic Math Level of 7 to begin the math sequence. Two years of high school algebra and one year of high school pre-calculus are recommended to prepare for this program.
- The biology and chemistry concentrations require one year of high school chemistry or CEM 101 with a "C" or better to enroll in CEM 111.

Minimum Concentration Credits Required for the Program:
Select a concentration for requirements and total credits required for program.

## Program Information Report

# Washtenaw Community College <br> <br> General Education Revision Program Change Form <br> <br> General Education Revision Program Change Form <br> <br> for AA and AS Programs 2018-2019 

 <br> <br> for AA and AS Programs 2018-2019}

| Program Code: HSMNAS | Program Name: Math $\quad$ science |
| :--- | :--- |
| Division Code: $A \sim S$ SE | Department: |

This form is to be used only for General Education Revision Program Changes for Associate in Arts (AA) and Associate in Science (AS) programs. Any other program changes should be submitted separately using a standard Program Change Form.
Directions:

1. Review each general education area under Requested Changes below and respond as needed.
2. Attach the semester program layout showing the current program listing from the WCC catalog.
a. Indicate any changes to be made on the semester layout.
b. Draw a line through any courses that should be removed on the semester layout.
c. Write in any courses that need to be added on the semester layout.
3. Submit this form and semester program layout to the Office of Curriculum and Assessment (SC 257).

Please review each General Education Area in the chart below, and record the needed changes in the chart and on the attached semester layout.

## REQUESTED CHANGES

## General Education Area

English Composition - The requirement for one writing/English composition course remains the same. No changes will be made unless specifically requested below. (Use Writing Elective or ENG 111)
Optional Change:
$2^{\text {nd }}$ Course in English Composition or one course in Communication
WCC previously required both a second composition/writing course and a communication course. Your options are:

1. Allow students to select any course that meets composition/writing or communication (recommended).
2. Require students to take a specific composition course (identify course below and on semester layout).
3. Require students to take a specific communication course (identify course below and on semester layout).

| Requested Change: |
| :---: |
| $2^{\text {nd }}$ Course in English Composition or one course in Communication Credit Hours <br> Because of this change, an extra 3-4 credit hours may be available in the program. Please specify how you would like to use those credit hours. Your options are: <br> 1. Reduce the number of credit hours if the program total is over 60 (recommended). <br> 2. Replace the course with elective credits as needed to reach a minimum of 60 credit hours. <br> 3. Add a specific program-related course (please add the course in the semester it should be taken on the semester layout). <br> Requested Change: |
| Mathematics - The requirement for one mathematics course remains the same. However, the courses that meet the MTA requirement have changed slightly. MTH 148, 149 and 167 do not meet the general education requirement for AA or AS degrees. Please identify an alternate course or list "Math elective". <br> Optional Change: |
| Natural Sciences from 2 disciplines including one lab course WCC previously required one natural science course. Your options are: <br> 1. No change needed - a second natural science course is already included in my program. <br> 2. Add a second natural science course in the semester shown on the semester layout attached. Unless specific courses are required, include one course identified as a lab science course. <br> Requested Change: |
| Social \& Behavioral Sciences from 2 disciplines - The requirement for two social and behavioral science courses remains the same. No changes will be made unless specifically requested below. Optional Change: |

Arts \& Humanities from 2 disciplines - The requirement for two arts and humanitles courses remains the same. No changes will be made unless specifically requested below. (Note: A department can designate a COM course as a requirement here. The same course cannot be counted in two areas.)
Optional Change:

## Computer and Information Literacy

The requirement for computer and information literacy has been removed. Your options are:

1. Continue to require a specific computer course. If a specific course is required in your program, we will leave it there. If you previously used "Computer and Information Literacy Course," you will need to specify either a specific course or a list of courses from which to choose.
2. Remove the computer and information literacy course if the program will still meet the minimum of 60 credit hours.
3. Remove the computer and information literacy course and replace the course with elective or other credits as needed to meet the minimum of 60 credit hours.
Required Change:

Elective Credits to reach a minimum of $\mathbf{3 0}$ credit hours - A course titled "General Education Credit(s) to Reach a Minimum of 30 Credit Hours" will be created and then added as needed to the program.

5. Pre-Pharmacy Concentration (PPHA)

Before beginning any transfer program, a student should consult with an academic advisor or counselor to obtain a program articulation agreement, or a transfer guide. Early in the program, the student should contact an undergraduate advisor at the transfer college for specific admission and curriculum requirements and, if available, an unofficial transfer-credit evaluation.

Copies of articulation agreements and transfer guides are available in the Counseling Office on the second floor of the Student Center Building. Computers with access to the Internet Web sites of four-year colleges and universities are also available there.

## Math and Science

Learn more about math or science through this associate degree program.

## Program Information Report

## Math and Science (ASMSAS)

Associate in Science Degree
Program Effective Term: Fall 2015
High Demand Occupation High Skill Occupation High Wage Occupation

This program prepares students to transfer to a four-year college or university to complete a bachelor's degree in actuarial science, biology, chemistry, math, pharmacy, or physics. The program will give students a solid foundation in math and science. Students should obtain program requirements and transfer equivalencies from the college to which they are transferring.

Complete the requirements for one of the following concentrations.
Biology/Pre-Medicine (BMED)
CEM 111 General Chemistry I
CEM 122 General Chemistry II
CEM 211 Organic Chemistry I
CEM 222 Organic Chemistry II
Elective: BIO 111, BIO 208, BIO 215, BIO 227, BIO 228, or BIO 237
Chemistry/Pre-Medicine (CMED)
CEM 111 General Chemistry I
CEM 122 General Chemistry II
CEM 211 Organic Chemistry I
CEM 222 Organic Chemistry II
MTH 197 Linear Algebra
Mathematics (MATH)
MTH 160 Basic Statistics
MTH 197 Linear Algebra
MTH 293 Calculus III
MTH 295 Differential Equations
Elective: Take an additional three credits in the MTH discipline
Physics/Pre-Engineering (PENG)
CEM 111 General Chemistry I
MTH 197 Linear Algebra
MTH 293 Calculus III
MTH 295 Differential Equations
PHY 211 Analytical Physics I
PHY 222 Analytical Physics II
Pre-Actuarial Science (PPAS)
ECO 211 Principles of Economics I
ECO 222 Principles of Economics II
MTH 191 Calculus I
MTH 192 Calculus II
MTH 197 Linear Algebra
MTH 293 Calculus III
Pre-Pharmacy (PPHA)
BIO 161 General Biology I Ecology and Evolution
BIO 162 General Biology II Cells and Molecules
CEM 211 Organic Chemistry I
CEM 222 Organic Chemistry II
PHY 111 General Physics I
PHY 122 General Physics II
MTH 191 Calculus I
Optional Transfer Courses for Pre-Pharmacy (PPHA): MTH 192 Calculus II, BIO 111 Anatomy and Physiology - Normal structure and Function, BIO 208 Genetics, BIO 237 Microbiology, BIO 215 Cell and Molecular Biology, BIO 227 Biology of Animals or BIO 228 Biology of Plants, MTH 160 Basic Statistics

## Articulation:

This program will fulfill the Michigan Transfer Agreement (MTA) requirements provided the student takes two science courses from two different disciplines. One course must have a lab component. Students must have MTA posted on their transcripts by the WCC Student Records Office.

This program will fulfill MACRAO requirements if, in addition to the courses completed to meet General Education requirements, students complete one additional course in Social and Behavioral Science. Students must have MACRAO posted on their transcripts by the WCC Student Records Office.

## Program Admission Requirements:

- Students must have an Academic Math Level of 7 to begin the math sequence. Two years of high school algebra and one year of high school pre-calculus are recommended to prepare for this program.
- The physics concentration requires one semester of high school physics or PHY 111 with a " C " or better to enroll in PHY 211.
- The biology, chemistry, and physics concentrations require one year of high school chemistry or CEM 101 with a "C" or better to enroll in CEM 111.
Minimum Concentration Credits Required for the Program:

## Program Information Report

## Notes:

*Students transferring to EMU as a biology major may substitute MTH 176 or any higher 4-credit hour math course for MTH 191. **Students transferring to EMU as a biology major may substitute MTH 160 or higher for MTH 192.
***Students transferring to EMU as a biology major may consider completing BIO 208 at WCC prior to transfer.

+ See the MTA list to make course selections from any discipline except ECO.
++ Transfer students should consider a course from the the EMU Diverse Word Requirements list.
+++ Students may take a 3 credit natural science course as the second Natural Science elective but may need an elective to bring the total number of credits back up to 60 if necessary.

Program Code:
ASMSAS ASMSAS
Division Code: MSN

Program Name: Math and Science
Effective Term: Fall 2015

## Directions:

1. Attach the current program listing from the WCC catalog or Web site and indicate any changes to be made.
2. Draw lines through any text that should be deleted and write in additions. Extensive narrative changes can be included on a separate sheet.
3. Check the boxes below for each type of change being proposed. Changes to courses, discontinuing a course, or adding new courses as part of the proposed program change, must be approved separately using a Master Syllabus form, but should be submitted at the same time as the program change form.

## Requested Changes:

$\square$ Program admission requirements
$\square$ Continuing eligibility requirements
$\square$ Program outcomes
$\square$ Accreditation information
$\square$ Discontinuation (attach program discontinuation
plan that includes transition of students and timetable
for phasing out courses)
Other Add concentrations for Pre-Pharmacy and
Pre-Actuarial Science $\rightarrow$ Remove Comp Science
Concentration

## Rationale for proposed changes or discontinuation:

Pre-Pharmacy: The current ASMSAS at WCC has biology, chemistry and physics concentrations but none require all 3 disciplines with math. Advanced studies in pharmacy, beyond the associate level, require that a rigorous foundation be built in these disciplines. Offering a comprehensive interdisciplinary degree will benefit our students transferring into pharmacy and /or other pre-med programs.

Pre-Actuarial Science: Actuarial Science is a growing field of study. The Occupational Outlook handbook predicts a $26 \%$ increase in employment in this area between 2012 and 2022. The 2012 median salary for an actuary was $\$ 93,680$ or $\$ 45.04$ per hour. This new concentration will guide students to complete the required combination of mathematics and economics needed in this field of study.

## Financial/staffing/equipment/space implications:

The courses used in these programs already exist and are used in other programs. The advisor for Math and Science and the advisor for Pharmacy Technology are an existing resource for these students.
List departments that have been consulted regarding their use of this program.
Pharmacy Technology, Math and Science

## 

Please submit completed form to the Office of Curriculum and Assessment and email an electronic copy to siohn@wcenet.edu for posting on the website.

## Math and Science (ASMSAS) Associate In Science Degree

## Articulation:

This program will fulfill MACRAO requirements if, in addition to the courses completed to meet General Education requirements, students complete one additional course in Social and Behavioral Science. Students must have their transcripts certified for MACRAO completion by the WCC Student Records Office.

## Program Admission Requirements:

- Students must have an Academic Math Level of 7 to begin the math sequence. Two years of high school algebra and one year of high school pre-calculus are recommended to prepare for this program.
- The physics concentration requires one semester of high school physics or PHY 111 with a "C" or better to enroll in PHY 211.
- The biology, chemistry, and physics concentrations require one year of high school chemistry or CEM 090 with a "C" or better to enroll in CEM 111.
Minimum Concentration Credits Required for the Program:

## Notes:

*Students transferring to EMU as a biology major may substitute MTH 176 or any higher 4-credit hour math course for MTH 191.
**Students transferring to EMU as a biology major may substitute MTH 160 or higher for MTH 192.
***Students transferring to EMU as a biology major may consider completing BIO 208 at WCC prior to transfer.

## Math and Science

Learn more about math or science through this associate degree program.

## Program Change or Discontinuation Form

## Program Code: <br> AS HS AS

## Division Code: MSN Department: Rife Science

## Directions:

1. Attach the current program listing from the WCC catalog or Web site and indicate any changes to be made.
2. Draw lines through any text that should be deleted and write in additions. Extensive narrative changes can be included on a separate sheet.
3. Check the boxes below for each type of change being proposed. Changes to courses, discontinuing a course, or adding new courses as part of the proposed program change, must be approved separately using a Master Syllabus form, but should be submitted at the same time as the program change form.
Requested Changes:

Rationale for proposed changes or discontinuation:
Replace existing introductory Biology sequence with new majors-level courses; adjust program to reflect computer literacy requirement; create flexibility in program so it can be adapted for transfer to various 4-year institutions; create flexibility in program so it can be used by Biology majors as well as Pre-med majors.

Financial/staffing/equipment/space implications:

List departments that have been consulted regarding their use of this program.
Biology, Chemistry
Signatures:

$\square$ Program outcomes
$\square$ Accreditation information
$\square$ Discontinuation (attach program discontinuation plan that includes transition of students and timetable for phasing out courses)
$\square$ Other $\qquad$

Show all changes on the attached page from the catalog.

## Rationale for proposed changes or discontinuation:

This change applies to the concentration in Mathematics. After researching comparable degrees in mathematics, requiring CPS 171 is not needed. In addition, the program does not require nine additional MTH credits as originally listed. Beyond MTH 295, it is very difficult for students to find courses that would meet this requirement.

## Financial/staffing/equipment/space implications:

## Description

This program prepares students to transfer to a four-year college or university to complete a bachelor's degree in biology, chemistry, computer science, math, or physics. The program will give students a solid foundation in math and science. Students should obtain program requirements and transfer equivalencies from the college to which they are transferring.

Complete the requirements for one of the following concentrations. The-same

Biology/Pre-Medicine (BMED)
CEM 111 General Chemistry I

To use MACRAO, students must have their transcripts certified for MACRAO completion by the WCC Student Records Office.

## Program Admission Requirements:

- Students must have a minimum COMPASS Trigonometry score of 46 or complete (MTH 176 and MTH 178) or NTH 180 with a grade of "C" or better to begin the math sequence. Two years of high school algebra and one year of high school pre-calculus are recommended to prepare for this program.
- The chemistry, physics, and computer science concentrations require one semester of high school physics or SHY 105 or PHY 111 with a "C" or better to enroll in PHY 211.
- A high school computer course or CIS 100 is required to enroll in CIS 110.
- The biology, chemistry, and physics concentrations require one year of high school chemistry or CEM 057 to enroll in CEM 111.

## Continuing Eligibility Requirements:

Students must demonstrate basic computer literacy skills by successfully passing the Computer and Information Literacy Test. The test may be taken at any point during the program, but must be completed before graduating.

| General | Education Requirements | (31 credits) |
| :--- | :--- | ---: |
| ENG 111 | Composition I | 4 |
| ENG 107* or | Technical Writing |  |
| ENG 226 | Composition II | 3 |
| COM 101 | Fundamentals of Speaking | 3 |
| MTH 191 | Calculus I |  |

## Program Approval Document Associate In Science In MATH AND SCIENCE

Prepared by

# Kathy Butcher, James Egan and David Shier <br> Math and Natural Sciences Division Washtenaw Community College 

April 21, 1999

## WASHTENAW COMMUNITY COLLEGE PROGRAM AUTHORIZATION FORM

1. Program Title: Science And Math Associate in Science Degree

W0modomgas
2. Division:MNS
3. Department: $\qquad$ cietiow
4. Type of Program:
$\square$ AAA.
Advanced Certificate
$\square$ Mastery Certificate
$\square$ Achievement CertificateCertificate of Completion
5. Will this program be Perkins funded? $\square$ yes no
6. Effective Year: Fall 1999
7. Program Description (for Catalog, brochures, etc.:

This program prepares to transfer to a four-year college or university to complete a bachelor of science (BS) degree program in the sciences. Four-year liberal arts graduates prepare for a wide variety of jobs and professions. Their studies emphasize communication, analytical, computational, scientific, and critical thinking skills. Science graduates become teachers, scientists, chemists, biologists, doctors, laboratory researchers, nurses, pharmacists, among other possible professions.
8. Advisors: Kathy Butcher, James Egan, Judith Fish, David Shier

## A. PROGRAM DESCRIPTION

This program prepares to transfer to a four-year college or university to complete a bachelor of science (BS) degree program in the sciences. Four-year liberal arts graduates prepare for a wide variety of jobs and professions. Their studies emphasize communication, analytical, computational, scientific, and critical thinking skills. Science graduates become teachers, scientists, chemists, biologists, doctors, laboratory researchers, nurses, pharmacists, among other possible professions.

## B. PROGRAM GOALS

To prepare students for a successful transfer to a four-year institution in a science or math field.

## C. NEEDS ASSESSMENT

Employment Outlook Information about employment trends indicate that the professions of biological, medical and physical scientists and chemists will grow faster than average from 1998-2006. Nationally, from 1998 through 2006, there will be a $20 \%$ increase in the openings for chemists and a $25 \%$ increase for scientists.

In the Ann Arbor area, it is expected that there will be $28 \%$ increase in openings for medicine and health science managers and a $35 \%$ increase in math and natural science managers.

## Expected Eamingswages

Nationally, average salaries for biologists with bachelor's degrees were approximately $\$ 25,868$ and for chemists, the average salary was $\$ 49,400$. In Michigan, the annual salary range for biologists was between $\$ 27,800-\$ 58,400$ and for chemists $\$ 29,114-\$ 50,998$. (Michigan Occupational Information System, 1998).

## D. ENROLLMENT PROJECTIONS

Estimated Number of Students per Year
We expect to enroll between 40-50 students the first semester and expect increased enrollments once this program becomes established.

## Longevity of Program

## E. PROGRAM COST ANALYSIS <br> Start-up Costs

There are no additional costs for this program.

## F. COURSE DESCRIPTIONS

1. BIO 101: Concepts of Biology

Basic principles and concepts of biology are surveyed in lecture and laboratory with emphasis on biological processes as well as practical applications. if followed by BIO 103, this course provides a comprehensive year sequence for biology majors. Taken alone, it serves as a good introduction to biology for non-science students.
2. BIO 103: General Biology II

The emphasis in this course is on analyzing the processes and mechanisms involved in biological systems including the cell, genetics, organisms and ecology/evolution. Topics are covered from an experimental point of view. This course, with BIO 101, provides a
comprehensive survey of biological concepts and shows the interrelationship of topics covered from the molecular to the population level. This course is required for the Biology/Pre-medicine Program.

## 3. BIO 215: Introduction to Cell Physiology

Introduction to the chemistry and physiology of living cells, including cell metabolism, membrane permeability and excitability, movement and contractile elements, gene expression and protein synthesis. Properties common to all living things will be emphasized, as well as the importance of those properties in the human organism.

## 4. BIO 216: Cell Physiology Lab

This is a lab course designed to be taken concurrently with BIO 215, Introduction to Cell Physiology.

## 5. BIO 227: Zoology

Lecture, field, and laboratory investigation provide an intensive study of the classification, evolutionary relationship, structure, and function of the major animal groups. Included are the sponges, jellyfish, worms, mollusks, insects, arthropods, starfish and other echinoderms, fish, amphibians, reptiles, birds and mammals.
6. BIO 228: Botany

In this class, field and laboratory investigations provide detailed study of plant structure and function. It is for students with a general interest in plants or to provide a basis for further work in botany or other programs.
7. CEM 111: General Chemistry I

This course covers the major topics in chemistry. Laws of chemical combination, states of matter, atomic and molecular structure, bonding, and other basic principles are covered. It is for students in a professional or preprofessional curriculum.

## 8. CEM 122: General Chemistry II

This course covers four major topics in chemistry: kinetics, chemical thermodynamics, chemical equilibria, and electrochemistry. Laboratory work includes qualitative and quantitative analysis.

## 9. CEM 211: Organic Chemistry I

This course provides students with the background in nomenclature of organic chemistry, stereochemistry, the preparation and reactions of aliphatic and aromatic compounds. Students also practice the preparation and handling of organic compounds in the laboratory. This is the first course in a two-semester sequence.

## 10. CEM 222: Organic Chemistry II

This course provides a continued exploration of nomenclature, stereochemistry, preparations and reactions of organic compounds including spectroscopic analysis in the laboratory. Students apply the techniques used in CEM 211 to the synthesis and analysis of complex organic compounds. Laboratory work includes hands-on spectroscopic analysis (IR, GC, and NMR) of products and unknowns. This is the second course in a two semester sequence of organic chemistry.

## 11. CIS 238: PC Assembly Language

This is a first course in the PC assembly language. The organization of the $80 \times 86$ microprocessor is examined to aid in the study of the instruction set. Topics include various character/numeric conversions, twos and tens complement arithmetic. string and bit manipulation, the calling of assembly language routines from other assembly programs as well as from high level language programs, and the use and modification of DOS and BIOS interrupt routines.
12. COM 101: Fundamentals of Speaking

Instruction is provided in essential speaking and listening skills. Through the use of practical experience, students receive help in organization and delivery. The course attempts to relieve the stress the average person encounters when speaking in public. Students gain a heightened awareness of the relationship between speaker and audience.
13. CPS 171: Introduction to Programming with C++

This course is an introduction to programming with C++ language. Students should have basic experience using a computer but no prior programming is required. (Experienced programmers should consider CPS 290). Students learn about problem solving strategies, top-down program development and programming style. Topics include sequential, decision and iterative control structures, functions, basic data structures, and an introduction to classes. Students write and execute approximately eight $\mathrm{C}++$ programs.

## 14. CPS 271: Object Features of C++

This course continues the study of C++ begun in CPS 171. (Experienced programmers should consider CPS 290.) Students learn the object-oriented features of the language. Topics include classes, constructors and destructors, operator overloading, pointers, dynamic allocation of memory, inheritance, polymorphism, file manipulation, templates, and exceptions.

## 15. CPS 272: Data Structures with C++

This is the third of a sequence of C++ courses, following CPS 171 and CPS 271. The course covers more advanced computer science features as implemented in C++. Topics include testing, verification and complexity of algorithms, recursion, advanced data structures, class libraries, and techniques for team design of large programs.
16. ENG 111: Compösition I

This course focuses on developing skills in critical reading, logical thinking, and written composition (from paragraphs to expository essays and documented papers). Reading materialt serve as a basis for papers and classroom discussions. Students write both in-class and outside themes frequently. Methods of organization and development are emphasized.
17. ENG 122: Composition II

This course is a continuation of ENG 111 and further develops critical reading and logical thinking skills. Students will write argumentative essays using a variety of formats. The research paper is emphasized.
18. MTH 160: Basic Statistics

This course provides students with a general understanding of statistical concepts dealing with the processing and interpretation of numerical information. Topics covered include describing a numerical data set, central tendency, variability, probability distributions, inference, and hypothesis testing. This course transfers to many four-year institutions. A graphing calculator is required for this course. Consult the time schedule for current brand and model.

## 19. MTH 191: Calculus I

This is first-semester college calculus of one variable. Topics include limits, continuity, derivatives, applications of derivatives, elementary integration, and applications of integration. This course transfers to four-year institutions. A graphing calculator is required for this course. Consult the time schedule for current brand and model.

## 20. MTH 192: Calculus II

This is second-semester college calculus of one variable. Topics include the calculus of transcendental functions, techniques of integration, indeterminate forms and improper integrals, sequences and series, parametric equations and polar coordinates. This course transfers to four-year institutions. A graphing calculator is required for this course.

## 21. MTH 197: Linear Algebra

This is an introductory college course in linear algebra. Topics include linear systems of equations, properties of vectors and matrices, determinants, vector spaces, linear transformations, eigenvalues, and applications. This course transfers to four-year institutions. A graphing calculator is required for this course. Consult the time schedule for current brand and model.

## 22. MTH 293: Calculus III

This is the third-semester college calculus of more than one variable. Topics include geometry in the plane and in space, vector-valued functions, partial derivatives, multiple integrals, and an introduction to vector calculus. This course transfers to four-year institutions.

## 23. WTH 295: Differential Equations

This is a first college course in elementary differential equations. Topics include techniques for solving ordinary differential equations of order one, techniques for solving linear equations, applications, the Laplace transform, and solving linear systems of equations using eigenvalues. This course transfers to four-year institutions. A graphing calculator is required for this course. Consult the time schedule for current brand and model.

## 24. PHY 211: Analytical Physics I

The first of a two-course sequence in calculus-based physics for students intending to major in science or engineering, PHY 211 develops the concepts of mechanics, heat, and wave motion. Laboratory exercises are included to assist students' understanding of these topics.

## 25. PHY 222: Analytical Physics II

This second part of a two-course sequence in calculus-based physics covers the concepts of electromagnetism, light, and modern physics extending the student's knowledge of physics learned in PHY 211.

## 27. PLS 112: Introduction to American Government

This class studies the forms and functions of American government with emphasis on national government. The decision-making process in Congress, the Presidency and the federal court system are studied. The course also examines the relationship of political parties and public opinion to the electoral process. This course is also taught as a television course.
G. ANALYSIS OF AFFECTED INSTRUCTIONAL UNITS AND CORE CURRICULUM

All of the affected instructional units are in support of this program.

## H. ARTICULATIONS

This program is considered a university parallel program and all the courses transfer to the four-year institutions. Students still need to consult with a transfer counselor or academic advisor to select elective courses for their program that are equivalent to the courses required by the college and major to which they will transfer. Transfer guides with specific course requirements and WCC equivalencies are available for most Michigan colleges and universities in the Transfer and Placement Center.
I. LICENSURE/ACCREDTTATION (IF APPLICABLE)

## ASSOCIATE IN SCIENCE DEGREE: Science and Math

General Requirements (33-34 credits)*

ENG 111\&122 Composition I\&II 7

CPS 171 Introduction to Programming with C++ 4

Select one courses in arts and humanities (choose from the list on p. 60 in the WCC Catalog)
MTH 191 Calculus I.................................................... 5
MTH 192 Calculus II
.4
PLS 112 Introduction to American Government
PSY 100 Introductory Psychology
Choose either: BIO 101 Concepts of Biology or Physics 211 Analytical Physics I
(Consider future course implications and
prerequisites when making this selection.)
Concesctution:
Select a concentration in Biology and General Science, Chemistry and Physics, Computer Science or Math. Please consult with an advisor prior to. beginning these concentrations.

Biology \& Pre-Medicine:

The following courses are required: BIO 103,
215, 216, 227, and 228; CEM 111, 122, 211 and 222...(32.cmaits.)
The following courses are required: CEM 111, 122, 211 and 222; MTH 197 and 293; and
Chemistry \& Pre-Medicine:

Physics:

Computer Science: The following courses are required: CPS 271, 272; CIS 238; MTH 197, 293; and PHY 222. Select an additional 6-8 credit hours in the humanities, social, and/or behavioral sciences ..(..30-32)

*If students are transferring to EMU or other Michigan universities, one opfion is to follow the MACRAO agreement. This agreement outlines a series of liberal arts courses that meet the general education requirements at various fouryear institutions. See p. 230 in the WCC Catalog and a counselor for additional information.

University of Michigan Notes:
${ }^{1}$ Except for the BGS degree, UM requires a minimum of 16 credit hours of one foreign language or fourth semester proficiency. Foreign language courses usually transfer in full year sequences only.

[^0]:    Biochemistry ( 400 level course at $U$ of M) Physiology

[^1]:    Minimum Credits Required for the Concentration or Option:

[^2]:    'Students transferring to EMU as a biology major may substitute MTH 176 or any higher 4 -credit hour math course for MTH 191
    ${ }^{2}$ Students transferring to EMU as a biology major may substitute MTH 160 or higher for MTH 192
    ${ }^{3}$ Students transferring to EMU as a biology major may consider completing BIO 208 Genetics at WCC prior to transfer
