Publish in the Following: College Catalog , Time Schedule , Web Page
Reason for Submission: Course Change
Change Information:

Course discipline code & number

Rationale: Update the course for the new discipline.

Proposed Start Semester: Fall 2025

Course Description: In this course, students will build their knowledge for a career in the automotive refinishing industry. Students will be exposed to today's industry standard methods, such as learning how to apply base and clear systems, single stage coatings, primers, and sealers. This is an entry level, hands-on, self-paced course where students will learn panel preparation, proper mixing of sprayable materials, proper spray gun techniques and industry safety procedures. This course was previously ABR 112.

1. Demonstrate the proper techniques of automotive finishing.

Assessment 1

Assessment Tool: Outcome-related student projects

Assessment Date: Winter 2026

Assessment Cycle: Every Three Years

Course section(s)/other population: All

Number students to be assessed: All

How the assessment will be scored: Departmentally-developed rubric

Standard of success to be used for this assessment: 75% of the students will score a 3 out of 5 or higher on each completed project.

Who will score and analyze the data: Departmental faculty

Assessment 2

Assessment Tool: Outcome-related departmental exam questions

Assessment Date: Winter 2026

Assessment Cycle: Every Three Years

Course section(s)/other population: All

Number students to be assessed: All

How the assessment will be scored: Answer key

Standard of success to be used for this assessment: 75% of students will score 75% or higher.

Who will score and analyze the data: Departmental faculty

2. Analyze vehicle paint condition and apply the necessary refinishing procedures.

Assessment 1

Assessment Tool: Outcome-related student projects

Assessment Date: Winter 2026

Assessment Cycle: Every Three Years

Course section(s)/other population: All

Number students to be assessed: All

How the assessment will be scored: Departmentally-developed rubric

Standard of success to be used for this assessment: 75% of the students will score a 3 out of 5 or higher on each completed project.

Who will score and analyze the data: Departmental faculty

Assessment 2

Assessment Tool: Outcome-related departmental exam questions

Assessment Date: Winter 2026

Assessment Cycle: Every Three Years

Course section(s)/other population: All

Number students to be assessed: All

How the assessment will be scored: Answer key

Standard of success to be used for this assessment: 75% of students will score 75% or higher.

Who will score and analyze the data: Departmental faculty

3. Perform necessary repairs in accordance with safety standards as instructed.

Assessment 1

Assessment Tool: Outcome-related student projects

Assessment Date: Winter 2026

Assessment Cycle: Every Three Years

Course section(s)/other population: All

Number students to be assessed: All

How the assessment will be scored: Departmentally-developed rubric

Standard of success to be used for this assessment: 75% of the students will score a 3 out of 5 or higher on each completed project.

Who will score and analyze the data: Departmental faculty

Assessment 2

Assessment Tool: Outcome-related departmental exam questions

Assessment Date: Winter 2026

Assessment Cycle: Every Three Years

Course section(s)/other population: All

Number students to be assessed: All

How the assessment will be scored: Answer key

Standard of success to be used for this assessment: 75% of students will score 75% or higher.

Who will score and analyze the data: Departmental faculty

4. Apply the proper refinishing materials on automobiles according to industry standards.

Assessment 1

Assessment Tool: Outcome-related student projects

Assessment Date: Winter 2026

Assessment Cycle: Every Three Years

Course section(s)/other population: All

Number students to be assessed: All

How the assessment will be scored: Departmentally-developed rubric

Standard of success to be used for this assessment: 75% of the students will score a 3 out of 5 or higher on each completed project.

Who will score and analyze the data: Departmental faculty

Assessment 2

Assessment Tool: Outcome-related departmental exam questions

Assessment Date: Winter 2026

Assessment Cycle: Every Three Years

Course section(s)/other population: All

Number students to be assessed: All

How the assessment will be scored: Answer key

Standard of success to be used for this assessment: 75% of students will score 75% or higher.

Who will score and analyze the data: Departmental faculty

Course Objectives

1. Recognize shop rules and safety requirements.
2. Inspect vehicle and identify substrate (material), type of finish, surface condition, and film thickness.
3. Demonstrate and explain the purpose and importance of refinish technicians using a complete paint system.
4. Recognize appropriate spray techniques such as gun arc, gun angle, gun distance, gun speed, and spray pattern overlap.
5. Identify appropriate metal treatment or primer in accordance with total product systems.
6. Apply Etch or Epoxy primers to the raw substrate; understand the differences between the two as well as why/when to use one versus the other.
7. Apply finish using appropriate spray techniques for the finish being applied.
8. Apply suitable sealer to the area being refinished when sealing is needed or desirable.
9. Demonstrate the main differences between using Single Stage coatings and the more modern Basecoat / Clearcoat system.
10. Identify buffing-related imperfections (swirl marks, wheel burns).
11. Describe how to correct buffing-related imperfections.
12. Buff and polish finish to complete projects.

13. Create a letdown panel for custom painting.
14. Develop a custom color using specialty products such as pearl and/or flake using a "Let Down Panel."
15. Apply custom coatings.
